

Student 8 **Kampati Pavan Kumar** 192524333RC

Level 3 — 10 marks/question

L3-Q1. (H) Palindrome

p

CODE

```
largest=0
num1=0
num2=0
for i in range(999,99,-1):
    for j in range(i,99,-1):
        product=i*j
        if str(product)==str(product)[::-1]:
            if product > largest:
                largest=product
                num1=i
                num2=j
print("Largest palindrome:",largest)
```

OUTPUT

Largest palindrome: 906609

L3-Q2. (H) Matrix Sum

p

CODE

```
a=[
    [3,4,5],
    [7,8,9],
    [10,11,12]
]
diagonal=0
columnsum=0
columnsum1=0
columnsum2=0
b=[]
c=[]
d=[]
e=[]
print("Row sum:",*[sum(r) for r in a])
for i in range(3):
    diagonal+=a[i][i]
print("Diagonal sum:",diagonal)
for i in range(3):
    columnsum+=a[i][0]
b.append(columnsum)
for i in range(3):
    columnsum1+=a[i][1]
c.append(columnsum1)
for i in range(3):
    columnsum2+=a[i][2]
d.append(columnsum2)
e=b+c+d
print("Column sum:",e)
```

OUTPUT

```
Row sum: 12 24 33
Diagonal sum: 23
Column sum: [20, 23, 26]
```
